

This page contains a list of all 329 languages for which official Wikipedias have been created under the auspices of the Wikimedia Foundation. The list includes 11 Wikipedias that were closed and moved to the Wikimedia Incubator for further development, leaving a current total of 318 active Wikipedias. Content in other languages is being developed at the Wikimedia Incubator; languages which meet certain criteria can get their own wikis.

The table entries are ordered by current article count. Each entry gives the language name in English (linked to the English Wikipedia article for the language); its "local name" (i.e. in the language itself, linked to the article in that language's wiki); the language code used in the wiki's URL address and in interwiki links to it (linked to the local Main Page); and statistics on articles, edits, administrators, users, active users, and images (most linked to an appropriate local special page).
